DuraVent Releases 2018 All Products Catalog

The catalog includes two new product line additions and more than 150 additional updates

DETROIT, Mich., April 12, 2018 – DuraVent, the recognized technological leader in the hearth and HVAC venting industries, today released its 2018 all products catalog. The catalog includes more than 150 total updates including the addition of two new product lines.

DuraVent catalog users will find the following among the updates:

- **PolyPro® Concentric line:** PolyPro Concentric provides users the most versatile polypropylene venting system for high efficiency, condensing appliances. The injection-molded modular system is designed with a powder-coated aluminum outer pipe and a polypropylene inner pipe. It does not require a locking band and provides users with a fast, safe, clean, and sustainable venting solution.
- **DuraTech® Premium line:** DuraTech Premium, a new product line for the North American market, is a double-wall, all-fuel chimney system for use with wood stoves, wood fireplaces and other appliances burning wood, oil, gas, or coal and has been tested to Canada's stringent 2100° F standard.
- **PelletVent® Pro Tees:** The new PelletVent Pro tees feature a spring button design that enables an easier twist removal of the clean out cap and a new, lower profile that makes it easier to clean and maintain pellet stoves.
- **DuraTech® Chimney Cap:** DuraTech 10"–16" chimney caps include a new space-saving design which makes cleaning easier thanks to no loose hardware and a twist off top. The new mesh design increases strength while decreasing package size by saving as much as 5" in diameter.
- **DuraChimney® II Cap:** While many caps are wide and won't fit under shrouds, the new, low profile DuraChimney II design provides more shroud installation capability while maintaining superior performance due to the mesh design characteristics.
- **DuraChimney® II Elbow Kits:** Elbows are always used in pairs and offset the vent run around an obstruction such as rafters or joints. The new DuraChimney II 8" Elbow Kits consist of two elbows and a strap. DuraChimney II products are designed to stay cool on the outside, to provide a hot draft on the inside and a maintain fire-safe design that protects both the chimney and the building.

"DuraVent is committed to remaining the product market leader for HVAC and hearth venting solutions," said Scott Schindlbeck, executive vice president of sales and marketing for DuraVent

and Security Chimneys. “We continue to differentiate ourselves from the competition by offering easier-to-install, more reliable, and higher quality products.”

The complete catalog is available now on DuraVent.com.

About DuraVent

DuraVent® is a recognized technological leader in the venting industry. Consistently the first-to-market with new innovations in venting systems, DuraVent has captured a leadership position in emerging markets.

Scientifically proven materials and unequalled engineering make DuraVent products not only the best and safest choice, but the only choice for professional quality venting solutions. DuraVent is committed to continuing this trend by providing the industry with cutting-edge products and refinements to existing products that not only meet the demands of today’s market but go beyond it.

DuraVent. *Leaders in-Venting Innovation.*™
