DuraVent to Introduce Enhanced Venting Solutions, Premium Product Line at HPBExpo 2018

DETROIT, Mich., February 21, 2018 – DuraVent today announced it will showcase its complete line of venting solutions and newest technologically-advanced products during the Hearth, Patio and Barbecue Expo 2018, March 8 – 10 in Nashville, Tenn.

To provide ease of installation when working in confined spaces, DuraVent will release its lower profile PelletVent® Pro Tee Cap. A one-handed twist-off cap held in place with a spring button design, the PelletVent Pro Tee Cap height has been reduced by 1” compared to previous designs and provides a smoother operation than previous generations.

DuraVent will also unveil its DuraChimney® II Cap. While many caps are wide and won't fit under shrouds, the new, low profile design provides more shroud installation capability while maintaining superior performance due to the mesh design characteristics. DuraChimney II products are built to stay cool on the outside, to provide a hot draft on the inside and to provide a fire-safe design that protects both the chimney and the building.

Engineered to exceed strict safety standards while offering the best available chimney system, DuraTech® Premium, a new product line for the North American market, will make its first exhibit appearance during HPBExpo 2018. DuraTech Premium is a double-wall, all-fuel chimney system for use with wood stoves, wood fireplaces and other appliances burning wood, oil, gas, or coal and has been tested to Canada's stringent 2100° F standard.

“With these additions to our 24 available product lines, DuraVent continues to exceed market demands while continuing to innovate products for the hearth and HVAC industries,” said Scott Schindlbeck, executive vice president of sales and marketing for DuraVent. “Our re-designed and new-to-market products give users the ability to install venting systems quicker while saving much needed space and project costs.”

Often regarded as the industry's premiere event, thousands of hearth, patio and barbecue professionals are expected to attend HPBExpo 2018 for a three-day, front row experience of the latest developments in indoor-outdoor living. DuraVent's complete product portfolio will be on display in booths #722 and #822.

About DuraVent

DuraVent® is a recognized technological leader in the venting industry. Consistently the first-to-market with new innovations in venting systems, DuraVent has captured a leadership position in emerging markets.

Scientifically proven materials and unequaled engineering make DuraVent products not only the best and safest choice, but the only choice for professional quality venting solutions. DuraVent is committed to continuing this trend by providing the industry with cutting-edge products and refinements to existing products that not only meet the demands of today's market but go beyond it.

DuraVent. *Leaders in-Venting Innovation.*
