

## INTRODUCING Oil Vent Pro For Oil Burning Appliances

Oil Vent Pro is a professionally engineered, easy to install vent system for oil boilers and other oil burning appliances. It features a smooth interior to reduce whistling and friction loss and utilizes a quick connect / release twist-lock design on the vent pipe that requires no tools. No sealant is needed on the vent pipe joints. Adjust the pipe's shaft to the precise length needed - no cutting is required. Designed with a removable end-snout termination (no tools needed) for easy servicing and installation...replaceable if ever damaged. The strong outer wall prevents damage and denting. Paintable using high-temperature stove paint. 4" x 7" concentric. Backed with a Limited Lifetime Warranty.

- Stylish clean look
- Removable exhaust cap – easily detachable for cleaning
- Removable air intake snout – for installation ease
- Continuous exhaust pipe – eliminates the chance for cross contamination
- Accommodates wall thicknesses up to 14"
- Concealed air intake – reduces the amount of exhaust recirculation
- Swivel end – adds adjustability
- Attaches directly to DuraVent's L-Vent pipe
- Lightweight

### Technical Diagram

### Description

### Stock #

Kit includes: Termination unit, 10 feet of Aluminum Flex, 2 Hose Clamps. (L-Vent pipe sold separately)	47PVP-OKA
45° L-Vent elbow	4PVP-E45
90° L-Vent elbow	4PVP-E90
12" Length of L-Vent pipe	4PVP-12
24" Length of L-Vent pipe	4PVP-24
36" Length of L-Vent pipe	4PVP-36
60" Length of L-Vent pipe	4PVP-60
Aluminum Flex, 25 feet (35 & 50 feet also available)	4DFA-25
