NEW Relining a Factory-Built Chimney Can Now Be Done Safely With a Listed System

M&G DuraVent is the first manufacturer to have a UL-listed relining system for factory-built chimneys to be used with solid-fuel appliances in the USA. When a homeowner installs a wood-burning insert into an existing UL127-listed fireplace, relining the existing chimney is critical for performance and safety.

What does the UL listing cover?
- All 127, 103, or 103HT chimneys
- Insulated chimneys - all sizes with 2” clearance
- Air cooled - clearance based on diameter
- All M&G Duravent UL1777 systems up to 8”
- Flex does not need insulation!!

Air Cooled Chimney Coverage:
- Up to 8” I.D. chimneys with at least 1 ¼” wall (ex. 8x10½)
  - 6x8½ is OK, 8x11 is OK
- Up to 8” I.D. chimneys require at least 1 ½” clearance
- Larger chimneys with at least 1 ½” wall (ex. 10x13)
  - 9x12 is OK, 10x14 is OK, 16x19 is OK
- Chimneys larger than 8” require at least 2” clearance

Factory-Built Reline Kit includes:
- Cap
- Storm Collar
- Support Bracket
- Ventilation Disk
- Centering Bracket
- DuraLiner 12” Length
- Flex Connector
- Flex Length (25’ or 35’)
- Adjustable Band
- Flex Adapter
