

# POLYPRO®

VENTING SYSTEM FOR CONDENSING BOILERS, WATER HEATERS, & WARM AIR FURNACES.

For venting, PolyPro® is the proven, healthy, environmentally safe alternative to PVC/CPVC. 100% recyclable, it contains no toxic or carcinogenic materials like chlorides or heavy metals. Nor does it release hazardous gases during combustion. PolyPro has a high operating temperature of 248°F. Terminations are designed to ensure maximum appliance performance and to prevent moisture ingress and icicle formation. The gasketed system requires no glue or solvents at connections, allowing easy removal and replacement of components. PolyPro has been used for safe venting throughout Europe for over fifteen years.
