

POLYPRO[®]

VENTING FOR CONDENSING GAS/OIL APPLIANCES

An environmentally safe and performance enhanced alternative to PVC or CPVC, PolyPro is an engineered venting system made of 100% recyclable polypropylene. Available in double-wall flex besides rigid single wall pipe. It's designed for use with high efficiency gas furnaces, condensing boilers, and instantaneous hot water heaters. No messy solvents or glues. No ugly terminations. PolyPro's terminations are engineered to work in cold, harsh climates without freezing up. Gasketed connections meet with a precise, tight seal. Can be cut to desired length needed. PolyPro has successfully vented appliances in Europe for over 15 years. Listed to ULC-S636. Find out more at www.duravent.com
