

DIRECT VENT PELLET SYSTEM

A concentric direct vent pellet system maintains indoor air quality by reducing drafts, while only requiring one wall or ceiling penetration to install. The CVS system supplies fresh air for combustion through the outer pipe, while exhaust is vented through the inner pipe. Available in 3" x 5" concentric pipe with galvalume or black exterior. Listed to UL 641 and ULC S609.

Features and Benefits:

- 1" clearance as a direct vent system for pellet stoves
- Clearances reduced to doors, windows and other home construction to Direct Vent code requirements
- Precision twist-lock connection on outer wall
- Silicone O-ring seals on inner liner and outer wall
- Supplies fresh air for combustion and exhaust for flue gasses
- 3" inner diameter and 5" outer diameter
